

PATLITE®

Thank you very much for purchasing our PATLITE product.

Notice to Customer

- Request the installation and wiring be performed by a professional contractor if construction work is involved.
- Prior to installation, read this manual thoroughly before using this product to ensure correct use.
- After reviewing this manual, if there are any questions regarding this product, please contact the nearest PATLITE office listed on the back cover of this manual.

Notice to Contractor

- Read this manual carefully prior to installation.
- Be sure to return this manual to the customer.

1 Safety Precautions

NOTES TO BE OBSERVED FOR SAFE OPERATION

In order to prevent any damage to the user and other personnel or to assets, note the following:

- The indications for warning are divided into the following classes according to the degree of danger or damage incurred when the warning is not taken into consideration and the product is not correctly used.

Warning

Indicates an imminently dangerous condition: failure to follow the instructions may lead to death or serious injury.

Caution

Indicates a potentially dangerous condition: failure to follow the instructions may lead to slight injury or property damage.

Warning

- To prevent from **short-circuits, electric shock or damage**, observe the following:
 - Be sure **the power is disconnected** before replacement or repair, including the replacement of the fuse.
 - Use this product in a **properly maintained condition**. (Replace or repair if the body, LED unit, etc. are damaged.)
- Request the installation and wiring be performed by a **professional contractor** if construction work is involved. Failure to comply may result in **fire, electric shock or falling from high places possible cause of failure may occur**.

Caution

- **Avoid long exposure to the Buzzer sound from a close distance.** Failure to observe this may lead from irritation to permanent damage to the ears. ( Flashing/Buzzer)
- In order to maintain protection of this product against dust and waterproofing performance, **be sure to use the head cover, LED unit and buzzer unit in the condition that it was originally attached.**
- **Do not operate this product without** the O-ring or the waterproof packing material. Failure to comply will result in lower waterproofing performance. Possible cause of failure may occur.
- **Do not apply voltage to the Flashing Common line** ( , ). **Apply voltage to the power source line** () only. Product failure will occur.
- When removing covers or packing from the equipment, which is attached to this product, be careful **not to snag** the product. Failure to comply may result in damage to the product.

Notice

- To ensure proper safety while using the signal tower, observe the following:
 - Perform **periodic pre-maintenance**.
 - As a precaution against problems occurring, **use this product together with other equipment**.
- **Be sure to discharge any static electricity** from the body before handling static sensitive parts of this product. (To prevent damage from static electricity, touch hands or other body parts to metals or an earth ground to discharge the body from static charge.)
- Use a soft cloth moistened with water when the LED Unit or body must be cleaned up. (Do not use thinner, benzine, gasoline or oil.)
- With a buzzer unit installed, moisture and oil that adheres to the buzzer unit will influence the sound pressure or tone quality produced, when an abundance is collected on the top surface of the buzzer unit. Be sure to periodically wipe off foreign objects with a soft cloth, etc.
- To ensure safety when this product is installed onto equipment, observe the following:
 - **Do not remove parts** beyond those designed to be removed from this product.
 - **Do not modify or disassemble** this product.
 - Use only **the specified replacement parts** listed in this manual.

4 Installation

Notice

- The following requirements are necessary for proper installation:
 - Install the signal tower where **excessive vibration** is not present.
 - Install the signal tower on a **sturdy surface**.
 - Install the signal tower on a **level surface**.
- Install the signal tower in an **upright position only**.
- When the installation location is unavoidably irregular and waterproof performance is required, use a sealant between the product and the installation surface.
- If the pole type requires an IP65 rating, apply sealant to the screws, nuts and wire distribution hole when installing the compatible bracket onto the installation surface. (**PJ** · **QJ**)
- Although the LR4-**WJ** mounting bolt moves prior to assembly, it is not a quality issue. Be sure to mount the product in the manner indicated below.

Basic Mounting Instructions

- 1** Make holes for the mounting and wire-distribution for the product.
(Check the Model and refer to the suitable attachment or mounting dimension figure.)
(**KT** Select among the two mounting options.)
- 2** Run the wiring through the distribution hole.
- 3** Secure the product with the bolts, nuts and screws.
(**LJ** required nuts and screws are not included.)

■ **LJ** Installation Figure

(Unit: mm)

- 2**
 - 3**
- Feed the wiring through the hole and set the pole in place to install.**

Recommended Nut Torque
30 N m

Point

When not using a L-bracket attachment, make a fitting hole of $\phi 22$ -23mm.

For M8 screw and nut size

For M10 screw and nut size

Recommended screw Torque
12.2 N m

KT Select between "Direct" or "Pole" mounting

(Unit: mm)

Direct Mount

1. Place the Mounting Bracket on an even surface.
2. Be sure to remove the waterproof packing from the Mounting Bracket.
3. Knock out the three knock-out holes with a steel punch, etc.
4. Insert the hexagon bolt into the knockout holes and affix with the flanged nuts.
5. Insert the waterproof packing.

Mounting Bracket with knock-outs Underside

Mounting Bracket with knock-outs Topside

Point

After inserting accessories,
check the bolt length.

Knock-Out Mount Bracket Side

Pole Installation

1. Be sure to remove the waterproof packing from the Mounting Bracket.
2. Install the Pole Waterproof Ring in the Mounting Bracket. Check that the 2 ribs are on the outside.

3. Insert Pole into the Mounting Bracket. See the figure on the left for details on the direction of insertion.
4. Tighten the Binding Head Tapping Screws (2 pcs.) from the topside of the Mounting Bracket.

2.25 N m

⚠ Warning

- Be sure **the power is disconnected** before wiring and changing fuses. Possible cause of short-circuiting may occur.
- Ensure **the proper working voltage** is used and that **direct current or alternating current** is properly applied. Possible cause of damage may occur.

⚠ Caution

- **Do not apply voltage to the Flashing Common line** (**01** , **02**).
Apply voltage to the source line (**M2**) only. Failure to comply will result in product damage.
- Do not control the flashing display by switching the power source ON and OFF for **M2** . Product failure will occur.
- It is not necessary to connect to an external lead for tiers not used. When an extra lead is not connected, it should be **individually insulated** with electrical tape or something similar. Failure to comply will result in damage due to short circuiting.
- **Do not pull** the lead wire or **push it inside** the body. Product failure may occur.

Notice

- When using multiple LED units of the same color, **make the contact capacity equal to the number of same color LED units multiplied** by the contact capacity for 1 tier.
(This is because LED units of the same color light up for one signal line.)
- To protect the power supply and other internal circuitry, be sure to install an external **fuse**.
- If wiring is extended beyond its factory length, **a relevance in the length of the wire and wire gauge** will cause a voltage drop.

Wiring Example

The following is a basic wiring example. If there are any special applications that require asking questions concerning this product, feel free to contact your PATLITE Sales Representative. Accidental wiring will result in product failure.

<Note> When lighting and flashing are used together, it is necessary to prepare an external contact for each lighting or flashing circuit.

Only apply voltage to Power Supply Wires.

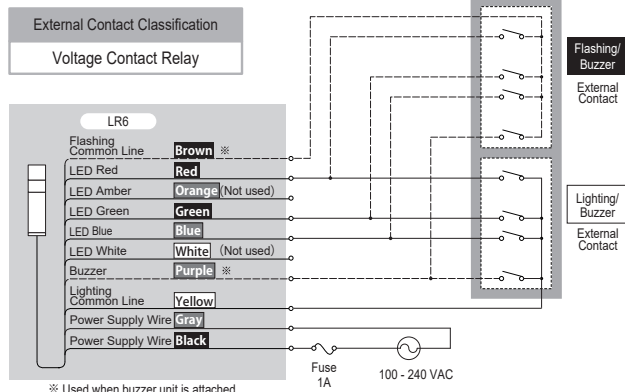

Only apply voltage to Power Supply Wires.

Lighting / Flashing / Buzzer (LR6-E-MZ)

Product Specifications **M2** 100 - 240 V AC

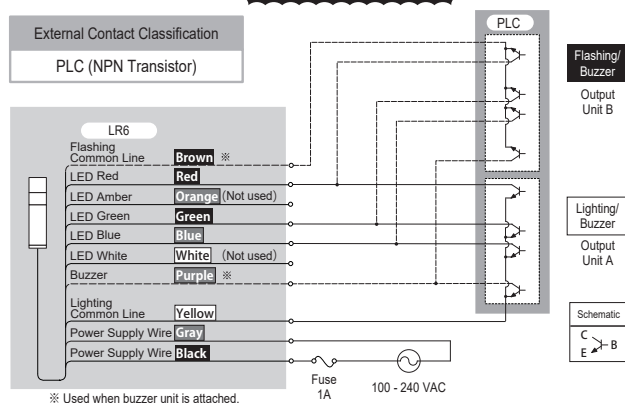

Only apply voltage to Power Supply Wires.

LR6-E-MZ Luminous Color

LED Color	Wiring Color
Red	Red
Green	Green
Blue	Blue
Yellow	Red + Green
Purple	Red + Blue
Cyan	Green + Blue
White	Red + Green + Blue

Only apply voltage to Power Supply Wires.

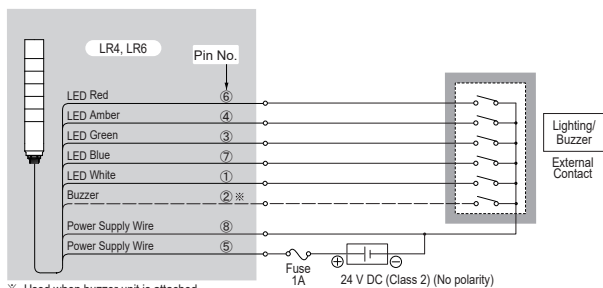

Point

- When flashing the LR6-E-MZ simultaneously with the LR6-E-R(Z)/Y(Z)/G(Z)/B(Z)/C, the flashing cycle of the LR6-E-MZ may shift from the other LED units.

External Contact Classification

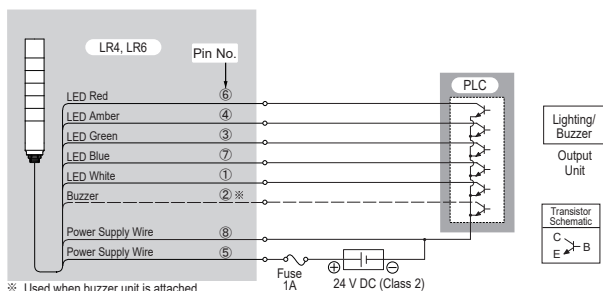

Voltage Contact Relay

※ Used when buzzer unit is attached.

External Contact Classification

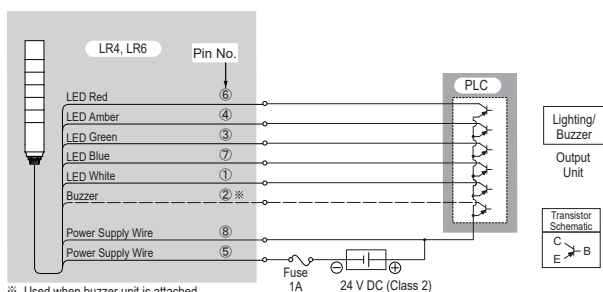

PLC (NPN Transistor)

※ Used when buzzer unit is attached.

External Contact Classification

PLC (PNP Transistor)

WT KT Terminal Block Array

1	Red	LED-R
2	Orange	LED-Y
3	Green	LED-G
4	Blue	LED-B
5	White	LED-C
6	Gray	Buzzer
7	Yellow	Power Supply Wire (Common)
8	Gray	Flashing Common
9	Black	Power Supply Wire (Signal-line Side)

WT KT Terminal Block Wiring Method

Remove the connector from the body unit before wiring.

1 A minus driver etc. is used to pry the lever slot of the Terminal Block open, by pushing straight onto the lever slot.

2 The stripped side of the lead wire is inserted in the slot.

3 The driver is removed to release the lever. (Check to make sure the lead wire has been locked in place.)

Recommended Lead-wire Specifications

Wire Type	Wire Gauge (Solid Wire)	Wire Gauge (Stranded Wire)
UL1007 / UL1430	0.14~1.5mm ²	AWG30~14

- Temperature rating should be above 75°C, and the conductor material should be of copper wire.

Point

- The minus driver blade should be at about 2mm by 0.5mm in size.
- Do not forcibly push the lever more than necessary with the driver. Failure to comply may damage the unit.
- Strip 9 to 10mm of wire insulation from the wire to insert it in the Terminal Block.
- When removing the lead wire, do not pull to remove, be sure to operate the lever to release the lock.

Attach the terminal block connector to the body unit after wiring.

※ The terminal block connector is attached to the body unit at all times after factory shipment. Refer to pg.52 for "Unit Detachment Method" for removal, wiring and attachment.

External Contact Capacity

Is : Current Capacity Vs : Withstand Voltage IL : Leakage Current Ta : Ambient Temperature

Rated Load Voltage		01 12 V DC	02 24 V DC	M2 100 - 240 V AC
LED Unit (1 Tier)	Signal Wire Current (Max.) / Voltage	100 mA / Power Supply Voltage	45 mA / Power Supply Voltage	45 mA / 24V DC
	Recommended Contact Capacity	Is ≥ 100 mA Vs ≥ 20 V DC (※1)	Is ≥ 100 mA Vs ≥ 35 V DC	Is ≥ 100 mA Vs ≥ 35 V DC
Buzzer	Signal Wire Current (Max.) / Voltage	250 mA / Power Supply Voltage	250 mA / Power Supply Voltage	250 mA / 24 V DC
	Recommended Contact Capacity	Is ≥ 300 mA Vs ≥ 20 V DC (※1)	Is ≥ 300 mA Vs ≥ 35 V DC	Is ≥ 300 mA Vs ≥ 35 V DC
Power Supply	Current Consumption (Max.)	500 mA (※2)	250 mA (※2)	150mA (※2)
	Recommended Contact Capacity	Is ≥ 700 mA Vs ≥ 20 V DC	Is ≥ 500 mA Vs ≥ 35 V DC	Inrush current or more contacts
	Signal Wire	LED [None (※1)] Buzzer [None (※1)]	LED [None (※3)] Buzzer [None (※3)]	None
Inrush Current	Power Supply Wire	0.7A / Less than 15ms	None (※4)	Ta=25°C : 25A / Less than 2ms (Cold-start) Ta=50°C : 50A / Less than 2ms (Cold-start)
	Leakage Current	IL ≤ 0.1 mA		

※1 ... When the (**Gray**) power supply wire is not connected, inrush current of 0.7A will flow through the signal wire.

Recommended Contact Capacity : Is ≥ 700 mA Vs ≥ 20 V DC

※2 ... Measured with five LED tiers and buzzer operating.

※3 ... Not exceeding Maximum Signal Wire Current Rating.

※4 ... Signal Wire Current (Max.) not exceeding the sum of total.

Recommended Fuse

Fuse Rated Current
250V / 1A
5x20mm Fast-Acting Glass Body Cartridge Fuse

- (Note)
- When a regulated power supply is not being used, select a fuse that meets class CC or more (**M2**).
 - Use a fuse holder with UL standard certification (**M2**).
 - Be sure **the power is disconnected** before changing fuses.

6 Buzzer Pattern Set-up

The **B** Flashing/Buzzer type includes a set up for four different patterns and sound reduction.

Set up the preferred pattern, using the DIP Switch after removing the buzzer unit.

Caution

- **Do not use excessive force** to set up the switches. Possible damage or malfunction may occur.
- **Do not adjust switches with a sharp object.** Possible damage to switches may cause it to be impossible to operate or cause partial movement of the contacts.

Buzzer Unit Underside View

Pattern Setup Table

Buzzer Sound	DIP Switch		Sound Pattern
	1	2	
No.1	OFF	OFF	Rapid Intermittent Beep
No.2	ON	OFF	Continuous Beep Sound
No.3	OFF	ON	Rapid Hi-Lo
No.4	ON	ON	Sweep Sound

DIP Switch	Volume
3	
OFF	Normal
ON	Sound Reduction

(Note) Do not use DIP Switch 4.
It is set to "OFF" at all times after factory shipments.

7 How to use the Folding Bracket

The **[Q]** Folding bracket is a retractable type, which can be pushed down while a product is still attached when transporting equipment.

(Fixed Position: 90 degrees to the right and 45 degrees to the right and left from an upright direction)

For example, when moving 90 degrees to the right from an upright position.

For example, when moving 45 degrees to the right from an upright position.

- 1 Depressing the locking lever on the left side of the Pole releases the bracket to be lowered. (Depressing the lock allows the Pole to swivel freely)

- 2 The Pole can then be pulled forward and pushed down in a clockwise direction. (From a level plane up to about a 15 degree angle)

- 2 The Pole can then be pulled forward and pushed down in a clockwise direction. (From a level plane up to about a 60 degree angle)

- 3 The Pole is pushed down to the right (clockwise). (The Pole is turned until it is latched in place by the locking lever)

Pushed down in a clockwise direction

Pushed down in a clockwise direction

8 Unit Detachment Method

Refer to the following diagrams when detaching the buzzer unit, recombining the LED Unit, etc.
Also, scan the QR Code to see the "How To" video.

Patlite Web site

⚠ Warning

- Be sure the power is **disconnected** before working on this product.

⚠ Caution

- **Do not apply excessive strength** with each unit or body. Failure to comply may damage the unit.
 - **Do not touch the connector area or the inside of the body and LED unit.** Failure to comply may damage the unit.
 - **Be sure to lock** each unit securely when attaching. Failure to comply may damage the unit.
 - Detach the unit in the following manner. Any other method may result in damaging the product.
- Attachment : Attach one unit at a time to the body.
Removal : Firmly hold the bottom section while removing the upper section.

Notice

- The maximum number of attachment units per product are five LED units, plus one buzzer unit.
*LR6-W4 : Three LED units (Red, Amber, Green) .
*LR6-W5 : Three LED units (Red, Amber, Green) and one buzzer unit.

< LED Unit to Body >

■ Removal

While holding the body, turn the LED unit counterclockwise, until it unlocks, then pull it upwards to remove.

< When the Buzzer Unit will not attach >

When the Buzzer Unit is detached, the tab and groove are positioned as in the figure below.

When the Buzzer Unit is detached, the tab is located in the groove.

⚠ Caution

If the Buzzer Unit cannot attach properly, check that the tab of parts inside the Buzzer Unit are fitted inside the groove. If the tab is outside of the groove as shown below, refer to the next page on how to reposition it. Also, as shown below, tab may come off the groove when removing the Buzzer Unit, depending on how it is removed. If the product is installed again in this condition, it may become damaged.

If the Buzzer Unit can't be attached, try the procedure below.

Buzzer Unit Underside View

< Head Cover to LED Unit >

■ Removal

While holding the LED unit, turn the head cover counterclockwise until it unlocks, then pull it upwards to remove.

<Unit Replacement Procedure>

■ Decreasing the LED Units

- 1 Remove the LED unit located above the unit which is intended to be removed.

- 2 While holding the LED unit, turn the LED unit counterclockwise, until it unlocks, then pull it upwards to remove.

- 3 Align the Positioning Mark after insertion, then turn the unit which is removed (1) clockwise to lock it.

■ Increasing the LED Units

- 1 Remove the LED unit located above the unit which is intended to be attached.

- 2 Align the Positioning Mark after insertion, then turn the unit clockwise to lock it.

- 3 Align the Positioning Mark after insertion, then turn the unit which is removed (1) clockwise to lock it.

■ Recombining the LED Units

- 1 Remove the LED unit located above the unit which is intended to be relocated.

- 2 While holding the LED unit, turn the LED unit counterclockwise until it unlocks, then pull it upwards to remove.

- 3 Remove the LED unit located above the unit which is intended to be relocated.

- 4 Align the Positioning Mark after insertion, then turn the unit which is removed (2) clockwise to lock it.

- 5 Align the Positioning Mark after insertion, then turn the unit which is removed (2) clockwise to lock it.

- 6 Align the Positioning Mark after insertion, then turn the unit which is removed (1) clockwise to lock it.

< When the LED Unit will not attach >

The structure of LED Unit is shown in the below figure.

Situation	Structure
 <p>LED Unit</p> <p>Body</p>	 <p>Lens</p> <p>Tab is placed in the groove</p> <p>Positioning Mark</p> <p>LED Unit Topside View (Removal LED Unit)</p> <p>When LED Unit is detached, the lens tab is usually located in the groove.</p>

⚠ Caution

If the LED Unit cannot attach properly, check that the tabs inside the LED Unit are fitted inside the groove. If the tab is outside of the groove as shown below, refer to the next page on how to reposition it. Also, as shown below, tabs may come off the groove when removing the LED Unit, depending on how it is removed. If the product is installed again in this condition, it may become damaged.

LED Unit Topside View

Do not remove it as the improper procedure depicts it below. A condition occurs in which the lens tab is out of the groove. If the product is installed again in this condition, it may become damaged.

If the LED Unit can't be attached, try the procedure below.

Turn the internal lens of the LED Unit counterlockwise until the tab fits in the groove.
Attach the LED Unit to the product.

9 Troubleshooting

Prior to contacting your nearest PATLITE Sales Representative, refer to the following tips, and try to solve them in the following table.

No.	Problem	Where to Check	What to do
1	The LED does not light up.	Is the electric wiring connected correctly?	Refer to " 5 Wiring" for proper wiring.
		Is the power properly supplying the correct voltage?	Check the rated supply voltage.
		Is the fuse blown out?	If the fuse is blown out, replace it.
2	A different LED from what I thought lights up when it turns on.	Is the electric wiring connected correctly?	Refer to " 5 Wiring" for proper wiring.
3	The Buzzer does not sound.	Is the electric wiring connected correctly?	Refer to " 5 Wiring" for proper wiring.
		Is the power properly supplying the correct voltage?	Check the rated supply voltage.
		Is the fuse blown out?	If the fuse is blown out, replace it.
		Is it the proper product model?	The buzzer function is only included with products with a " B " in the model number.
4	The Buzzer volume is small.	Is the Buzzer volume set to minimum?	Refer to " 6 Buzzer Pattern Set-up" on how to adjust the volume.
5	The Buzzer does not sound immediately.	Is the sound pattern something other than Continuous Beep Sound?	To sound in conjunction with a buzzer input, use a Continuous Beep Sound.
6	The LED does not flash.	Is the electric wiring connected correctly?	Refer to " 5 Wiring" for proper wiring.
		Are the external contacts for lighting turning on?	Priority is given to the lighting input over the flashing input when simultaneous signals are applied.
		Is it the proper product model?	The flash function is only included with products with a " B " in the model number. However, LR6-W4/W5/W8 are excluded.

If the problem is not resolved after doing the procedure as above, refer to the end of this document for the contact information and contact the nearest PATLITE Sales Representative.

		Max.	(※2) Applies to LR6-W5 and LR6-W8. LR6-W4 does not support the Buzzer Unit.
		Typ.	Due to the characteristics of the LED elements, a variation in difference of the color tone and brightness of every product may occur.
		Max.	UL Recognized Component (File No.E215660)

- This product is designed for use on a flat surface for a **Type 1 Enclosure**.
(Conformity requirements for UL Standard)
- Use a **"class 2"** power supply specified in the guidelines under **UL1310**. (Conformity requirements for UL Standard)
- This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These restrictions are limited to cases where this equipment is operated in a business district, and it is designed to take the relevant protective measures against electromagnetic noise hindrance.
- This product must not be used in residential areas. (Conformity requirements for the CE Marking)

General Specifications ([01])

Model		LR5-□□1□□□W		
Rated Voltage		12V DC		
Operating Voltage Range		Rated Voltage ±10%		
Signal Wire Current (Per Unit)	Typ.	LED Unit : 90mA		
		Buzzer Unit : 90mA (※1)		
	Max.	LED Unit : 100mA		
Inrush Current	Power Supply Wire	Buzzer Unit : 250mA (※1)		
		0.7A / Less than 15ms		
	Signal Wire	LED Unit : none (※2)		
		Buzzer Unit : none (Not exceeding Maximum Signal Wire Current Ratings) (※2)		
Rated Power Consumption (Per Unit)	Typ.	LED Unit : 1W		
		Buzzer Unit : 1.1W (※1)		
	Max.	LED Unit : 1.1W		
		Buzzer Unit : 1.2W (※1)		
Standby Power Consumption	Typ.	LED Unit : none		
		Buzzer Unit : 0.3W		
	Max.	Body Unit : 0.1W		
Operating Ambient Temperature		-20℃ ~ +50℃		
Operating Ambient Humidity		Less than 90% RH (No Condensation)		
Storage Ambient Temperature		-30℃ ~ +60℃		
Storage Ambient Humidity		Less than 90% RH (No Condensation)		
Mounting Location		Indoor Only		
Mounting Direction		Upright		
Protection Rating	IP65(IEC 60529) / NEMA TYPE 4X,13			
	LJ	IP54(IEC 60529) / NEMA TYPE 4X,13		
Environmental Condition	Upright			
Insulation Resistance		More than 1MΩ at 500VDC between live part and non-current carrying metallic part		
Withstand Voltage		500VAC applied for 1min Between live part and non-current carrying metallic part without breaking insulation		
Flashing Rate		60±2 Flashes Per Minute		
Buzzer Sound/ Typical Frequency	No.1	Rapid Intermittent Beep / 3378Hz	No.3	Rapid Hi-Lo / 2016Hz&3012Hz
	No.2	Continuous Beep Sound / 3378Hz	No.4	Sweep Sound / 1000Hz-4032Hz
Setting		Depending on DIP Switch settings. Refer to Section 6 "Buzzer Pattern Set-up".		
Outer Dimensions		Refer to Section 3 "Part Names and Outer Appearance"		
Mass (Tolerance ±10%)	(LED Unit) + [Buzzer Unit]			
	WJ	0.2kg + (0.04kg)×Tiers + [0.05kg]		
	LJ	0.49kg + (0.04kg)×Tiers + [0.05kg]		
	PJ	0.38kg + (0.04kg)×Tiers + [0.05kg]		
Sound Pressure Level		Typ.80dB		Sound Reduction approximately -10dB, depending on DIP Switch settings. Refer to Section 6 "Buzzer Pattern Set-up"
Environmental Condition		Buzzer sound No.4 was measured from the total circumference of the Buzzer Unit at 1m		
Conformity Standards		UL 508, CSA-C22.2 No. 14, EMC Directive (EN 61000-6-4, EN 61000-6-2) RoHS Directive (EN IEC 63000), FCC Part 15 Subpart B Class A KC (KN 61000-6-4, KN 61000-6-2)		
Remarks		(※1) Environmental Condition: Buzzer sound No.2 (Continuous Beep Sound) (※2)When (Gray) power supply wire is not connected, inrush current or 0.7A will flow through the signal wires. Due to the characteristics of the LED elements, a variation in difference of the color tone and brightness of every product may occur. UL Recognized Component (File No.E215660)		

- This product is designed for use on a flat surface for a **Type 1 Enclosure**.

11 Replacement Parts

The following replacement parts for this product are available for the customer to change or replace.

Replacement Parts for LR4			
O-ring 40	Head Cover 40 [W/U]	Pole Bracket 40 [W/U]	Filter Sheet 40
 <p>5 pcs.</p>		 <p>Accessories: O-ring 40 1 pc. Pole Waterproof Ring 1 pc. Binding Head Tapping Screw 2 pcs.</p>	 <p>5 pcs.</p>

Replacement Parts for LR5			
O-ring 50	Head Cover 50 [W/U/K]	Pole Bracket 50 [W/U/K]	Filter Sheet 50
 <p>5 pcs.</p>		 <p>Accessories: O-ring 50 1 pc. Pole Waterproof Ring 1 pc. Binding Head Tapping Screw 2 pcs.</p>	 <p>5 pcs.</p>

Replacement Parts for LR6			
O-ring 60	Head Cover 60 [W/U]	Pole Bracket 60 [W/U]	Filter Sheet 60
 <p>5 pcs.</p>		 <p>Accessories: O-ring 60 1 pc. Pole Waterproof Ring 1 pc. Binding Head Tapping Screw 2 pcs. ※Not compatible with W4/W5/W8 and WC.</p>	 <p>5 pcs.</p>

Replacement Parts for LR7			
O-ring 70	Head Cover 70 [W/U/K]	Pole Bracket 70 [W/U/K]	Filter Sheet 70
 <p>5 pcs.</p>		 <p>Accessories: O-ring 70 1 pc. Pole Waterproof Ring 1 pc. Binding Head Tapping Screw 2 pcs.</p>	 <p>5 pcs.</p>

Replacement Parts for WT	Replacement Parts for LR4/LR5/LR6/LR7

Specifications

Model	SZP-001W
Mounting Location	Indoor Only
Protection Rating	IP65 (with product attached)
Material	PC
Mass (Tolerance ±10%) ※ No Accessories	0.04kg
Remarks	There are no contents of controlled substances exceeding the threshold for the RoHS Directive.

〈Note〉 ● It's possible to run a cable out from the side.

Mounting Dimensional Drawing

■ **SZP-001W**

(Unit : mm)

Pole Installation

1. Install the Pole Waterproof Ring in the Circular Bracket. Check that the 2 ribs are on the outside.

2. Insert Pole into the Circular Bracket. See the figure on the left for details on the direction of insertion.
3. Tighten the Binding Head Tapping Screws (2 pcs.) from underneath the Circular Bracket.
4. Put the Waterproof Packing on the bottom of Circular Bracket.

⚠ Notice

Installation using materials other than the specified accessories is not covered under warranty.

Cutting a side-hole for cable (Procedure)

This part has perforations to make it possible to run a cable out from the side.

1. Refer to the enlarged drawing and cut the outlined part of the bracket. Cut in two places with nippers.

2. Break off the outlined part with pliers. If there are burrs, carefully remove with pliers or a file.

Mounting Location	Indoor Only
Material	ADC12
Mass (Tolerance $\pm 10\%$) ※ No Accessories	0.06kg
Remarks	There are no contents of controlled substances exceeding the threshold for the RoHS Directive.

Pole Bracket Installation

1. Insert the supplied pole ring into the Pole Bracket.

2. Assemble the pole and Pole Bracket.
(Refer to "Assembling the Pole and Pole Bracket")

3. Pass the cable from the side of the Pole Bracket. ※

4. Pull out the cable from the side of the pole landmark.

Assembling the Pole and Pole Bracket

- ① Insert the pole into the Pole Bracket, lining up the indentations.
- ② In two positions, use the tapping screws secure the Pole Bracket and pole. (Recommended torque: $1.4\text{N} \cdot \text{m}$)

※When using M12 cable, one side must be a lead wire.

5. In 3 places, affix the nuts included with the Compatible Models, to secure the Pole Bracket and unit.

Product Attachment (SZW-940U,SZW-960U,SZW-970U)

1. Insert the mounting screws of the product into the Compatible Direct Mount Bracket. See the figure on the left for details on the direction of insertion.

If there's a gap between the Compatible Direct Mount Bracket bottom and the waterproof packing, push until the waterproof packing hits the bottom.

2. Secure the product with the flanged nuts (3 pcs.) from underneath the Bracket.

Recommended Torque

0.6 N m

Notice

Installation using materials other than the specified accessories is not covered under warranty.

Do not use if twisting, etc., has occurred in the waterproof packing.

Failure to comply will result in lower waterproofing performance. Possible cause of failure may occur.

Product Attachment (SZW-950U Mounting Hole A)

1. Be sure to remove the waterproof packing, from the Compatible Direct Mount Bracket.
2. Insert the mounting screws of the product into the Compatible Direct Mount Bracket.
See the figure on the left for details on the direction of insertion.
3. Secure the product with the flanged nuts (3 pcs.) from underneath the Compatible Direct Mount Bracket.

Recommended Torque

0.6 N m

4. Put the waterproof packing on the Compatible Direct Mount Bracket bottom.

Push until the waterproof packing hits the Compatible Direct Mount Bracket bottom.

Notice

Installation using materials other than the specified accessories is not covered under warranty. Do not use if twisting, etc., has occurred in the waterproof packing. Failure to comply will result in lower waterproofing performance. Possible cause of failure may occur.

Product Attachment (SZW-950U Mounting Hole B)

Compatible Direct Mount Bracket

Flanged nut (3 pcs.)

1. Be sure to remove the waterproof packing, hexagon bolts and franged nuts from the Compatible Direct Mount Bracket.
2. Insert the mounting screws of the product into the Compatible Direct Mount Bracket.
See the figure on the left for details on the direction of insertion.
3. Secure the product with the flanged nuts (3 pcs.) from underneath the Compatible Direct Mount Bracket.

Recommended Torque

0.6 N m

Notice Installation using materials other than the specified accessories is not covered under warranty.

4. Place the waterproof packing in line with the mounting hole.
5. Run the wiring through the distribution hole.
Secure the Compatible Direct Mount Bracket with M4 screw (2 pcs.).
※M4 screw is not included.
Be sure to prepare mounting screws separately, and consider the screw thread to be 14 mm or less in order to attach the Compatible Direct Mount Bracket, and the board thickness of the mounting surface.

Recommended Screw

M4×14

Recommended Torque

0.6 N m

Notice Do not use if twisting, etc., has occurred in the waterproof packing.
Failure to comply will result in lower waterproofing performance. Possible cause of failure may occur.
